2 Important

Safety
Read this user manual carefully before you use the appliance, and save it for future reference.

Danger
- The appliance must not be immersed in water, nor rinsed under the tap.

Warning
- Check if the voltage indicated on the appliance corresponds to the local power voltage before you connect it.
- The appliance is intended to be used in household or similar applications such as:
  - kitchen areas in shops, offices, and other residential type environments;
  - farm houses;
  - by clients in hotels, motels and other residential type environments;
  - bed and breakfast type environments.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- If the power cord set is damaged, it must be replaced by a cord set available from the manufacturer.
- The appliance is not intended to be operated by means of an external timer or a separate remote-control system.
- The ducts in the pressure regulator should be checked regularly to ensure that they are not blocked.
- The container must not be opened until the pressure has decreased sufficiently.
- Cleaning and user maintenance shall not be made by children.
- Keep the appliance and its cord out of reach of children.
- WARNING: Always follow the instructions and use the appliance properly to avoid potential injury.
- WARNING: Make sure to avoid spillage on the power connector to avoid a potential hazard.
- CAUTION: Surface of the heating element is subject to residual heat after use.
- Use clean and soft cloth to clean the surfaces in contact with food.
- Only connect the appliance to a grounded power outlet.
- WARNING: Always release pressure by turning the pressure regulator to the steam vent position, otherwise liquid might spurt from the pressure regulator valve. Wait until the pressure is naturally released and the floater has dropped to open the top lid.

Caution
- Never use any accessories or parts from other manufacturers or that Philips does not specifically recommend. If you use such accessories or parts, your guarantee becomes invalid.
- Do not expose the appliance to high temperatures, nor place it on a working or still hot stove or cooker.
- Do not expose the appliance to direct sunlight.
- Place the appliance on a stable, horizontal, and level surface.
- Do not use the handle on the top lid to move the appliance, use the side handles instead.
- When pressure is being released from the pressure regulator valve, hot steam or liquid will be ejected. Keep hands and face away from the steam vent.
- Always put the inner pot in the appliance before you put the plug in the power outlet and switch it on.
- Do not use the appliance if too much air or steam is leaking from under the top lid.
- When cooking soup or viscous liquid, do not release pressure by turning the pressure regulator to the steam vent position, otherwise liquid might spurt from the pressure regulator valve. Wait until the pressure is naturally released and the floater has dropped to open the top lid.
Always unplug the appliance if not used for a longer period. If the appliance is used improperly or for professional or semi-professional purposes, or if it is not used according to the instructions in this safety leaflet, the guarantee becomes invalid and Philips refuses liability for any damage caused. Visit www.philips.com/support to download the user manual.

Electromagnetic fields (EMF)
This Philips appliance complies with all applicable standards and regulations regarding exposure to electromagnetic fields.

2. What's in the box (fig. 1)
Main unit
Rice & Soup ladle
Measuring cup

3. Overview (fig. 1)

4. Using the electric pressure cooker
Before first use
1. Remove all packaging materials from the appliance.
2. Take out all the accessories from the inner pot.
3. Clean the parts of the electric pressure cooker thoroughly before using it for the first time (see chapter Cleaning and Maintenance).

Preparations before cooking (fig. 2)
Before using the electric pressure cooker to cook food, follow these preparation steps:
1. Hold the lid handle and turn it anti-clockwise until the lid cannot move any more, then lift up the lid.
2. Take out the inner pot from the electric pressure cooker and put the pre-washed food in the inner pot.
3. Make sure the outside of the inner pot is dry, then put it back into the electric pressure cooker.
4. Place the pre-lit lid onto the electric pressure cooker and turn it clockwise. You will hear a “click” sound when the lid is properly locked.

Normal cooking
For normal cooking, you can cook food without adding water in the inner pot. To do this, make sure to turn the pressure regulator to “bake”.

Note
- Make sure the regulator points at the sealed position.
- Assemble the lower screw back to the regulator.
- Make sure the floating valve is clean and not blocked.
- And wait until the floating valve has dropped.

Cooking food (3 fig.
Note
- Do not fill the inner pot with less than 1/3 or more than 2/3 full of food and liquid.
- For food that expands during cooking, do not fill the inner pot with more than 2/3 full of food and liquid.
- For rice cooking, follow the water level indications on the inside of the inner pot. You can adjust the water level for different types of rice according to your own preference. Do not exceed the maximum quantities indicated on the inside of the inner pot.
- Make sure the floating valve is clean and not blocked.
- And wait until the floating valve has dropped.

Pressure cooking
1. Follow the steps in “Preparations before cooking”.
2. Turn the pressure regulator to “seal”.
3. Put the plug in the power socket.
4. Press “Power” button to turn on the electric pressure cooker. The power indicator starts flashing.
5. Press “Cancel/Start” button to start the cooking process.
6. When the electric pressure cooker reaches the operating pressure,
   - The timer starts counting down the cooking time.
   - The alarm indicator starts flashing.
   - “Cooking time” button starts flashing.

To set a different cooking pressure keeping time,
1. Press “Pressure” button to change the pressure.
2. Press “Start/Reheat” button to start the cooking process if necessary.
3. The electric pressure cooker automatically switches to keep warm mode.

To set a different cooking time,
1. Press “Cancer/Start” button to change the cooking time.
2. Press “Start/Reheat” button to start the cooking process if necessary.
3. The electric pressure cooker automatically switches to keep warm mode.

Note
- The pressure keeping time is not adjustable for “Risotto” and “Rice”.

Pressure regulator
A Warning
- Do not disassemble the pressure regulator during cooking. Always unplug the electric pressure cooker and wait until the pressure has been naturally released sufficiently to do so.

To disassemble the pressure regulator
1. Turn the lower screw anti-clockwise until it becomes loose.
2. Pull it up and take out the pressure regulator.
3. Place the electric pressure cooker in the pressure regulator to turn off the keep warm function or when not in use.

5. Cleaning and Maintenance

Note
- Unplug the electric pressure cooker before starting to clean it.
- Wait until the electric pressure cooker has cooled down sufficiently before cleaning it.

</table>

Exterior
Surface of the top lid and outside of the main body
- Wipe with a cloth dampened with soap water.
- Only use soft and dry cloth to wipe the control panel.
- Make sure to remove all food residues around the pressure regulator valve and floating valve.

Pressure regulator valve and floating valve
- Disassemble the pressure regulator, soak it in warm water, and clean with sponge.
- Remove food residues in the pressure regulator valve and floating valve.

Accessories
Measuring cup, rice & soup ladle, and inner pot.
- Soak in hot water and clean with sponge.
- Put sealing ring in place correctly on inner lid.
- Remove the detachable inner lid. Soak it in warm water and clean with sponge.

Do not use the inner lid if it is deformed.
- Make sure that the sealing ring is clean and in good condition.
- The accessible surfaces may become hot when the appliance is operating. Take extra caution when touching the surfaces.
- Beware of hot steam coming out of the floating valve and pressure regulator valve during cooking or when you open the lid. Keep hands and face away from the appliance to avoid the risk of burning.
- Do not lift and move the appliance while it is operating.
- Do not exceed the maximum water level indicated in the inner pot to prevent overflow.
- Do not place the cooking utensils inside the pot while cooking.
- Only use the cooking utensils provided. Avoid using sharp utensils.
- To avoid scratches, it is not recommended to cook ingredients with crustaceans and shellfish. Remove the hard shells before cooking.
- Do not place a magnetic substance on the lid. Do not use the appliance near a magnetic substance.
- Always keep the appliance cool down to room temperature before you clean or move it. Always clean the appliance after use. Do not clean the appliance in dishwasher.
