Read this Manual

Dear Customer,
Please read this User Information carefully and keep it to refer to at a later date. Pass it on to any subsequent owner of the appliance.

This manual contains sections of Safety Instructions, Operating Instructions, Installation Instructions and Troubleshooting Tips, etc.

Carefully read it before using the dishwasher will help you to use and maintain the dishwasher properly.

Before Calling for Service

To review the section on Troubleshooting Tips will help you to solve some common problems by yourself and not need to ask for the help of professional technicians.

NOTE:
The manufacturer, following a policy of constant development and updating of the product, may make modifications without giving prior notice.

1. Safety Information

⚠️ WARNING !
When using your dishwasher, follow the basic precautions including the following:

⚠️ WARNING! HYDROGEN GAS IS EXPLOSIVE
Under certain conditions, Hydrogen gas may be produced in a hot-water system that has not been used for two weeks or more. HYDROGEN GAS IS EXPLOSIVE. If the hot-water system has not been used for such a period, before using the dishwasher turn on all hot-water faucets and let the water flow from each for several minutes. This will release any accumulated hydrogen gas. As the gas is flammable, do not smoke or use an open flame during this time.

⚠️ WARNING! PROPER USE
- Do not abuse, sit on, or stand on the door or dish basket of the dishwasher.
- Do not touch the heating element during or immediately after use.
- Do not operate your dishwasher unless all enclosure panels are properly in place. Open the door very carefully if the dishwasher is operating. There is a risk of water squirting out.
- Do not place any heavy objects or stand on the door when it is open. The appliance could tip forward.
- When loading items to be washed:
  - Locator sharp items so that they are not likely to damage the door seal;
  - Load sharp knives with the handles up to reduce the risk of cut-type injuries;
  - Warning: Knives and other utensils with sharp points must be loaded in the basket with their points down or placed in a horizontal position.
- When using your dishwasher, you should prevent plastic items from contacting with heating element.
- Check that the detergent receptacle is empty after completion of the wash cycle.
- Do not wash plastic items unless they are marked dishwasher safe or the equivalent. For plastic items not so marked, check the manufacturer's recommendations.
- Use only detergent and rinse additives designed for an automatic dishwasher. Never use soap, laundry detergent, or hand washing detergent in your dishwasher.
- Other means for disconnection from the supply must be incorporated in the fixed wiring with at least 3mm contact separation in all poles.
- Keep children away from detergent and rinse aid, keep children away from the open door of the dishwasher, there could still be some detergent left inside.
- Young children should be supervised to ensure that they do not play with the appliance.
- This product is not designed for use by persons (including children) who have reduced physical, sensory or mental capacities or persons with no experience or knowledge, unless they are instructed and supervised in the use of the appliance by a person responsible for their safety.
- Dishwasher detergents are strongly alkaline. They can be extremely dangerous if swallowed. Avoid contact with skin and eyes, and keep children away from the dishwasher when the door is open.
- The door should not be left in the open position since this could present a tripping hazard.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- Please dispose of packing materials properly.
READ AND FOLLOW THIS SAFETY INFORMATION CAREFULLY
SAVE THESE INSTRUCTIONS

Use the dishwasher only for its intended function.
During installation, the power supply must not be excessively or dangerously bent or flattened.
Do not tamper with controls.
The appliance is to be connected to the water mains using new hose sets, and the old hose-sets should not be reused.
Make sure that the carpet must not obstruct the openings at the bottom base.
Indoor use only.

2. Disposal

Dispose of the dishwasher packaging material correctly.
All packaging materials can be recycled.
Plastic parts are marked with the standard international abbreviations: (e.g. PS for polystyrene, padding material)

This appliance is identified according to the European guideline 2002/96/EC on waste electrical and electronic equipment - WEEE. The guideline specifies the framework for an EU-wide valid return and re-use of old appliances.

WARNING!

Packaging material could be dangerous for children!
For disposing of package and the appliance please go to a recycling centre. Cut off the power supply cable and make the door closing device unusable.
Cardboard packaging is manufactured from recycled paper and should be disposed in the waste paper collection for recycling.
By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.
For more detailed information about recycling of this product, please contact your local city office and your household waste disposal service.

IMPORTANT!

To get the best performance from your dishwasher read all operating instructions before using it for the first time.

3. Operation Instruction

1. Power switch: To turn on/off the power supply.
2. Delay button: To start or delay the start time of any cycle automatically up to 24 hours.
3. Program key-press: Press the key to scroll through the wash cycles. The corresponding programme light will be ON to indicate which wash cycle has been selected.
4. 3 in 1 button: Press this button you can choose or cancel the 3 in 1 function.
5. Start/pause button: The appliance will start or pause the expected washing cycle.
6. Child lock button: Press the two buttons for 3 seconds, the appliance could be locked and any button cannot be used.
7. Program indicator light: When you select a washing programme, the corresponding light will display.
8. Rinse aid refill indicator: The indicator lights up when the dispenser needs to be refilled.
9. 3 in 1 indicator: The indicator lights up when the additional function is selected.
10. Child lock indicator: The Child lock lights up after flashing 6 times when you press the Child lock button for 3 seconds, and the Child lock indicator will flash after pressing the button for 3 seconds.
11. Washing light: To come on when the dishwasher is washing.
12. Drying light: To come on when the dishwasher is drying.
13. Digital display: To display the running time remain, malfunction codes and delay time.
To open the dispenser, turn the cap to the "open" (left) arrow and lift it out.

Pour the rinse aid into the dispenser, be careful not to overfill.

Replace the cap by inserting it aligned with "open" arrow and turning it to the "closed" (right) arrow.

The rinse aid is released during the final rinse to prevent water from forming droplets on your dishes that can leave spots and streaks. It also improves drying by allowing water to sheet off the dishes. Your dishwashers are designed to use liquid rinse aids. The rinse aid dispenser is located inside the door next to the detergent dispenser.

To fill the dispenser, open the cap and pour the rinse aid into the dispenser until the level indicator turns completely black. The volume of the rinse aid container is about 140ml.

Be careful not to overfill the dispenser, because this could cause over sudsing. Wipe away any spills with a damp cloth. Don’t forget to replace the cap before you close dishwasher door.

Attention!
Clean up any rinse aid split during filling with an absorbent cloth to avoid excess foaming during the next wash.

Adjusting Rinse Aid Dispenser
The rinse aid dispenser has four or six settings. Always start with the dispenser set on "4". If spots and poor drying are problems, increase the amount of rinse aid dispensed by removing the dispenser lid and rotating the dial to "5". If the dishes still are not drying properly or are spotted, adjust the dial to the next higher number until your dishes are spot-free. The dose is factory set in position 5.

NOTE: Increase the dose if there are drops of water or lime spots on the dishes after washing. Reduce it if there are sticky whitish streaks on the dishes or a bluish film on glassware or knife blades.

B. Function of Detergent
Detergents with its chemical ingredients are necessary to remove dirt, crush dirt and transport it out of the dishwasher. Most of commercial quality detergents are suitable for this purpose.
Concentrated Detergent
Based on their chemical composition, dishwasher can be split in two basic types:
- conventional, alkaline detergents with caustic components
- low alkaline concentrated detergents with natural enzymes
The use of "normal" washing programme in conjunction with concentrated detergents reduces pollution and is good for your dishes; these washing programmes are specially matched to the dirt-dissolving properties of the enzymes of the concentrated detergent. For this reason "normal" washing programme in which concentrated detergents are used can achieve the same results that can otherwise only be achieved using "intensive" programme.

Detergent Tablets
Detergent tablets of different brands dissolve at different speeds. For this reason some detergent cannot dissolve and develop their full cleaning power during short programmes. Therefore please use long programmes when using detergent tablets, to ensure the complete removal of detergent residuals.

Detergent Dispenser
The dispenser must be refilled before the start of each washing cycle following the instructions provided in the Wash Cycle Table. Your dishwashers use less detergent and rinse aid than conventional dishwashers. Generally, only one tablespoon of detergent is needed for a normal wash load. Also, more heavily soiled items need more detergent. Always add the detergent just before starting dishwasher, otherwise it could get damp and will not dissolve properly.

Amount of Detergent to Use

![Detergent Dispenser](image)

**NOTE:**
- If the lid is closed: press release button. The lid springs open.
- Always add the detergent just before starting each wash cycle. Only use branded detergent aid for dishwasher.

**WARNING!**
Dishwasher detergent is corrosive! Take care to keep it out of reach of children

Use only detergent specifically made for use in dishwashers. Keep your detergent fresh and dry. Don't put powder detergent into the dispenser until you're ready to wash dishes.

Fill in the detergent
Fill the detergent dispenser with detergent. The marking indicates the dosing levels, as illustrated on the right:
- The place of main wash cycle detergent placed, "MIN" means approximately 20g of detergent.
- The place of pre-wash cycle detergent placed, approximately 5g of detergent.

Please observe the manufacturer's dosing and storage recommendations as stated on the Detergent packaging.

Close the lid and press until it locks in place.

If the dishes are heavily soiled, place an additional detergent dose in the pre-wash detergent chamber. This detergent will take effect during the pre-wash phase.

**NOTE:**
You find information about the amount of detergent for the single programme on the last page. Please be aware that according to the level soiling and the specific hardness of water, differences are possible.

Please observe the manufacturer's recommendations on the detergent packaging.

Use of "3 in 1" Detergent Tablets
General Advice
1. Before using these products you should first check that the water hard-ness in your supply is compatible with the use of these products as the detergent manufacturers instructions (on the product packaging).
2. These products should be strictly used according to the detergent manufacturers instructions.
3. If you encounter problems when using "3 in 1" products for the first time then please contact the detergent manufacturers care line (the telephone number is given on the product packaging).

These products are detergents with integrated and combined detergent/rinse aid functions. Before using these products you should first check that the water hardness in your supply is compatible with the use of these products as per the detergent manufacturers (on the product packaging).
To select "3in1" function:
1. close the door and select the 3in1 washing cycle by pressing the "3in1 button until the "3in1" indicator blinks.
2. The 3in1 washing cycle will be available after pressing the start/pause button, and the "3in1" indicator lights.

To cancel "3in1" function:
Follow the 'Cancelling a programme in progress' instructions.
If you decide to switch to the use of a standard detergent system we advise that you:
1. Refill the rinse aid compartments.
2. Switch the water hardness setting to the highest possible position and run for three normal cycles without load.
3. Readjust the water hardness setting again according to the conditions for your region (For more information please refer to your instruction manual).

5. Loading the Dishwasher Baskets

For best performance of the dishwasher, follow these loading guidelines. Features and appearance of baskets and Cuffrey tray may vary from your model.

Attention before or after Loading the Dishwasher Baskets
1. Scrap off any large amounts of leftover food. It is not necessary to rinse the dishes under running water. Place objects in the dishwasher in the following way:
   A. Items such as cups, glasses, pots/pan, etc. are stood upside down.
   B. Curve items, or those with recesses, should be at a slant so that water can run off.
   C. They are stacked securely and can not tip over.
   D. They do not prevent the spray arms from rotating while washing takes place.
2. Very small items should not be washed in the dishwasher as they could easily fall out of the Baskets.
3. The upper and lower baskets can not be pull out in the same time when the dishwasher is Loading, or it may lead to dumping.

Removing the Dishes
To prevent water dripping from the upper basket into the lower basket, we recommend that you empty the lower basket first and then the upper basket.

Loading the Upper Basket
The upper basket is designed to hold more delicate and lighter dishware such as glasses, coffee and tea cup and saucers, as well as plates, small bowls and shallow pans (as long as they are not too dirty). Position the dishes and cookware so that they do not get moved by the spray of water.

Upper Basket Height Adjustment
Basket height adjustment mechanism on the upper basket of your machine is designed to let you adjust the height of your upper basket upwards or downwards, without removing it from your machine when it is full, and create large spaces at

<table>
<thead>
<tr>
<th>Lower basket</th>
<th>Type</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>G</td>
<td>Soup plate</td>
<td></td>
</tr>
<tr>
<td>H</td>
<td>Dinner plate</td>
<td></td>
</tr>
<tr>
<td>I</td>
<td>Dessert plate</td>
<td></td>
</tr>
</tbody>
</table>

Loading the Lower Basket
We recommend that you place large items which are most difficult to clean in to the lower basket: pots, pans, lids, serving dishes and bowls, as shown in the figure below.

It is preferable to place serving dishes and lids on the side of the baskets in order to avoid blocking the rotation of the top spray arm.

Pots, serving bowls, etc. must always be placed top down.
Deep pots should be slanted to allow water to flow out.

The bottom basket features fold down tine rows so that larger or more pots and pans can be loaded.

Upper/Lower basket Folding racks
Folding racks consisting of three/two parts in the upper/lower basket of your machine are designed in order to let you place big items easier as pots, pans, etc. If requested, each part can be folded separately, or all of them can be folded and larger can be obtained. You can use folding racks by raising them upwards, or by folding.
For washing in the dishwasher the following cutlery/dishes

Are not suitable
- Cutlery with wooden, horn china or mother-of-pearl handles
- Plastic items that are not heat resistant
- Older cutlery with glued parts that is not temperature resistant
- Bonded cutlery items or dishes
- Pewter or cooper items
- Lead crystal glass
- Steel items subject to rusting
- Wooden platters
- Items made from synthetic fibre

Are of limited suitability
- Some types of glasses can become dull after a large number of washes
- Silver and aluminium parts have a tendency to discolor during washing
- Glazed patterns may fade if machine washed frequently

WARNING! Do not let any item extend through bottom

NOTE: Do not put in items that are dirty of cigarette ash, candle wax, lacquer or paint. If you buy new dishes please make sure that they are suitable for dishwashers.
### 6. Starting a Washing Programme

AS/NZS 2007.1: This programme is the test cycle. The information for comparability test in accordance with AS/NZS 2007.1, as follows:
- Capacity: 14 settings
- Position of Upper basket: Low position
- Rinse aid setting: 5 (or 4 for four setting dispenser)

**NOTE:** We recommend you open the door slightly 50 mm to assist in drying of the dishes after every wash.

### Turning on the Appliance

Starting a wash cycle...

1. Draw out the lower and upper basket, load the dishes and place them back. It is recommended to load the lower basket first, then the upper one (see the section entitled "Loading the Dishwasher"). Pour in the detergent.
2. Insert the plug into the socket. The power supply is 220V-240VAC 50 Hz, the specification of the socket is 12 A 250 VAC 50 Hz.
3. Make sure that the water supply is turned on to full pressure. Close the door, press the "Power" button, press the programme button to select a desired "Wash Cycle". (See the section entitled "Wash Cycle Table").

**NOTE:** A click could be heard when the door is closed perfectly.

When the washing is over, you can shut off the switch by pressing "Power" button.

### Switching on

1. Open the tap, if it is closed.
2. Close the door.
3. Make sure the spray arms are not obstructed.
4. Switch the dishwasher on using the "Power" button. The additional indicators, delay start indicators and status indicator could light up periodically one by one.

### Select a programme

Choose your programme according to the type of load and how dirty it is. The different programmes and their uses are described in the programme chart later on in this booklet. Use the programme selector to select the expected programme.

### Change the Programme

Premise: A cycle that is underway can only be modified if it has only been running for a short time. Otherwise, the detergent may have already been released, and the appliance may have already drained the wash water. If this is the case, the detergent dispenser must be refilled (see the section entitled "Fill in the Detergent").

Press the "Power" button and turn on it again. Press the "programme" button to choose the expected cycle setting (see the section entitled "Starting a wash cycle... ").

**NOTE:** If you open the door when the washing cycle underway, the appliance will pause and emit warning signals, the display appears E1. When you close the door, the machine will keep on working after 10 seconds.

The 6 programme lights show the state of the dishwasher:

- a) One of the programme lights on -> cycle running
- b) One of the programme lights bliking -> pause

**NOTE:** If all the lights begin to glimmer, that indicates the machine is out of order, please turn off the main power and water supply before calling a service.

### Forget to Add Dish

A forgotten dish can be added any time before the detergent cup opens.
1. Open the door a little to stop the washing.
2. After the spray arms stop working, you can open the door completely.
3. Add forgotten dishes.
4. Close the door, the dishwasher will work after ten seconds.

**WARNING!**

It is dangerous to open the door when washing, because the hot water may scald you.

Switch Off the Dishwasher
- The digital display appears "---" and the buzzrings 6 times, only in this case the programme has ended.
1. Switch off the dishwasher by pressing the "Power" button.
2. Turn off the water tap!

Open the door carefully. Hot steam may escape when the door is opened!

- Hot dishes are sensitive to knocks. The dishes should therefore be allowed to cool down around 15 minutes before removing from the appliance.
- Open the dishwasher's door, leave it ajar and wait a few minutes before removing the dishes. In this way they will be cooler and the drying will be improved.

Unloading the dishwasher
- It is normal that the dishwasher is wet inside.
- Empty the lower basket first and then the upper one. This will avoid water dripping from the upper basket onto the dishes in the lower one.
7. Maintenance and cleaning

Filtering System

The filter is used to avoid the big remnants and other sundries getting inside the pump. The residue can obstruct the filter in sometime.

The filter system consists of a coarse filter, a flat (Main filter) and a micro filter (fine filter).

1 Flat filter
Food and debris will be trapped by a special jet on the lower spray arm.

2 Coarse filter
Big debris, such as bone and glass that could clog the drain will be trapped in the coarse filter.
To remove an item caught in this filter, gently squeeze the taps on the top of this filter and lift it out.

3 Micro filter
This filter holds soil and food residue in the sump area and prevents it from being redeposit on the dishes during a cycle.
- Inspect the filters for obstructions every time the dishwasher has been used.
- By unscrewing the coarse filter, you can remove the filter system. Remove any food remnants and clean the filters under running water.

Step 1. contrarotate the Coarse filter, and then lift it up;
Step 2. lift the Flat filter up

NOTE: If operate from step 1 to step 2, the filter system will be removed; while operate from step 2 to step 1, the filter system will be installed.

Filter assembly

For best performance and results, the filter assembly must be cleaned. The filter efficiently removes food particles from the wash water, allowing it to be recirculated during the cycle. For this reason, it is a good idea to remove the larger food particles trapped in the filter after each wash cycle by rinsing the semicircular filter and cup under running water. To remove the filter assembly, pull on the cup handle in the upward direction. The entire filter assembly should be cleaned once a week. To clean the coarse filter and the micro filter, use a cleaning brush. Then, reassemble the filter parts as shown in the figures above and reinsert the entire assembly in the dishwasher, positioning in its seat and pressing downward. The dishwasher must never be used without the filters. Improper replacement of the filter may reduce the performance level of the appliance and damage dishes and utensils.

WARNING!
Never run the dishwasher without the filters in place. When cleaning the filters, don't knock on them. Otherwise, the filters could be contorted and the performance of dishwasher could be debased.

Cleaning the Spray Arms
It is necessary to clean the spray arms regularly for hard water chemicals will clog the spray arm jets and bearings. To remove the spray arms, screw off the nut clockwise to take out the washer on top of the spray arm and remove the arm. Wash the arms in soapy and warm water and use a soft brush to clean the jets. Replace them after rinsing thoroughly.

Caring for the Dishwasher
To clean the control panel, use a lightly dampened cloth then dry thoroughly.
To clean the exterior, use a good appliance polish wax. Never use sharp objects, scouring pads or harsh cleaners on any part of the dishwasher.

Protect Against Freezing
If your dishwasher is left in an unheated place during the winter, ask a service technical to:
1. Cut off electrical power to the dishwasher.
2. Turn off the water supply and disconnect the water inlet pipe from the water valve.
3. Drain water from the inlet pipe and water valve. (Use a pan to catch the water)
4. Reconnect the water inlet pipe to the water valve.
5. Remove the filter in the tub and the bottom and use a sponge to use up water in sump

Cleaning the Door
To clean the edge around the door, you should use only a soft warm, damp rag. To prevent penetration of water into the door lock and electrical components, do not use a spray cleaner of any kind.
Also, never use abrasive cleaners or scouring pads on the outer surfaces because they will scratch the finish. Some paper towels can also scratch or leave marks on the surface.

WARNING!
Never use a spray cleaner to clean the door panel for it could damage the door lock and electrical components. It is not allowed to use the abrasive agent or some paper towel because of the risk of scratching or leaving spots on the stainless steel surface.
How to Keep Your Dishwasher in Shape

After Every Wash
After every wash, turn off the water supply to the appliance and leave the door slightly ajar so that moisture and odors are not trapped inside.

Remove the Plug
Before cleaning or performing maintenance, always remove the plug from the socket. Do not run risks.

No Solvents or Abrasive Cleaning
To clean the exterior and rubber parts of the dishwasher, do not use solvents or abrasive cleaning products. Use only a cloth and warm soapy water. To remove spots or stains from the surface of the interior, use a cloth dampened with water and a little white vinegar, or a cleaning product made specifically for dishwashers.

Moving the Appliance
If the appliance must be moved, try to keep it in the vertical position. If absolutely necessary, it can be positioned on its back.

Seals
One of the factors that cause odors to form in the dishwasher is food that remains trapped in the seals. Periodic cleaning with a damp sponge will prevent this.

Attention:
The installation of the pipes and electrical equipments should be done by professionals.

8. Installation
Keep this instruction manual in a safe place for future reference. If the appliance is sold, given away or moved, please ensure the manual is kept with the machine, so that the new owner may benefit from the advice contained within it.

Please read this instruction manual carefully: it contains important information regarding the safe installation, use and maintenance of the appliance.

If the appliance must be moved at any time, keep it in an upright position; if absolutely necessary, it may be tilted onto its back.

Positioning and leveling
1. Remove the appliance from all packaging and check that it has not been damaged during transportation. If it has been damaged, contact the retailer and do not proceed and further with the installation process.
2. Check the dishwasher by placing it so that its sides or back panel are in contact with the adjacent cabinets or even with the wall. This appliance can also be recessed under a single work top (see the Assembly instruction sheet).

3. Position the dishwasher on a level and sturdy floor. If the floor is uneven, the front feet of the appliance may be adjusted until it reaches a horizontal position (the angle of inclination must not exceed 2 degrees). If the appliance is levelled correctly, it will be more stable and much less likely to move or cause vibrations and noise while it is operation.

Connecting the water and electricity supplies

Connection to the water and electricity supplies should only be performed by a qualified technician.

The dishwasher must not stand on top of the water hoses or the electricity supply cable.

The appliance must be connected to the water supply network using new piping. Do not use old piping.

Connecting the water inlet hose
Connect the cold water supply hose to a threaded 3/4(inch) connector and make sure that it is fastened tightly in place. If the water pipes are new or have not been used for an extended period of time, let the water run to make sure that the water is clear and free of impurities. If this precaution is not taken, there is a risk that the water inlet can get blocked and the appliance could be damaged.

Connecting the water outlet hose
Fit the drainage hose of your machine to the drainage pipe without bending.

If the length of the hose is not sufficient, apply to the authorized service for an extension made from the same material as the original. Remember that the length of the hose should not exceed 4meters even when with an extension.

If the drainage hose is longer than the 4 m., the dishes will not be cleaned properly secure your hose firmly to the drainage pipe to avoid it coming off during the washing process.

Electrical connection
Before inserting the plug into the electrical socket, make sure that:

- the socket is earthed and complies with current regulations;
- the socket can withstand the maximum load of the appliance, which is indicated on the data plate located on the inside of the door (see description of the appliance);
- the power supply voltage falls within the values indicated on the data plate on the inside of the door;
- the socket is compatible with the plug of the appliance. If this is not the case, ask an authorised technician to replace the plug (see assistance); do not use extension cables or multiple sockets.

★ For optional
**Start of Dishwasher**

The followings should be checked before starting the dishwasher:
1. Whether the dishwasher is level and fixed
2. Whether the inlet valve is opened
3. Whether there is leakage at the connections of the conducts
4. Whether the wires are tightly connected
5. Whether the power is switched on
6. Whether the inlet and drain hoses are knotted
7. All packing materials and printings should be taken out from the dishwasher

**Attention**

After installation, please put this manual into the bags of printings. The content of this manual is very helpful to the users.

### 9. Troubleshooting Tips

**Error codes**

When some malfunctions happen, the appliance will display error codes to warn you.

<table>
<thead>
<tr>
<th>Codes</th>
<th>Meanings</th>

Product Dimensions

READ THE INSTRUCTION BOOKLET BEFORE INSTALLING AND USING THE APPLIANCE.

The manufacturer will not be responsible for any damage to property or to persons caused by incorrect installation or improper use of the appliance.

The manufacturer is not responsible for any inaccuracies, due to printing or transcription errors, contained in this handout. In addition, the appearance of the figures reported is also purely indicative.

The manufacturer reserves the right to make changes to its products when considered necessary and useful, without affecting the essential safety and operating characteristics.

Technika constantly seeks ways to improve the specifications and designs of their products.

Whilst every effort is made to produce up to date literature, this document should not be regarded as an infallible guide. Actual product only should be used to derive cut out sizes.

All Technika Appliances must be installed by a qualified person/s with adherence to the relevant electrical, plumbing and AGA codes, with compliance being issued as required by state or national legislation.

Additionally all Technika Upright cookers must have chains installed correctly in adherence to the relevant AGA, and plumbing codes by the Licensed installer.

For maximum effectiveness and efficiency all rangehoods should be installed with the use of ductwork, by a licenced installer with adherence to the relevant state and national building codes and regulations.

All Technika appliances are for Domestic use only, and must be installed by a licence installer into Domestic Applications only, without exception and to the required Authorities guidelines. Any installation outside of this will VOID warranty.

Alfresco areas are not a Domestic application.
